DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Rejections not maintained are withdrawn.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The newly amended claim 1 is generally narrative and indefinite, failing to conform with current U.S. practice. Examples include:

At lines 2-3, the phrase "including a longitudinal section ... on at least a portion thereof" is vague, indefinite and confusing. Clarification is requested. The Examiner suggests Applicant refers to Specification, at lines 15-16 of page 3 in particular, for appropriate changes.

Also at line 4, the Examiner suggests change the phrase "disposed in" to -- coated on--. Please also refer to lines 27-28 of page 3 in the Specification.

Finally, at lines 10-11, the phrase "a layer comprising ... said second strip" is vague, indefinite and confusing. Clarification is requested. The Examiner suggests

again that Applicant should refer to Specification, at lines 17-18 of page 4 in particular, for appropriate changes.

Response to Amendment

5. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lin (US 6027802) either individually, or in view of Abe et al. (US 6017610), substantially for the reasons set forth in section 9 of Paper No. 5, together with the following additional observations.

Applicant's Response arguing that Lin teaches away from the present invention since Lin directs "the exterior surface of the cover layer (11) may be coated with either an antistatic agent or ..." (Response, pages 4-5, bridging paragraph) is not persuasive. The Examiner believes that such embodiment is at most a "may be", i.e., an optional embodiment. The Examiner reiterates that in Fig. 4 Lin teaches a layer of adhesive at each edge of the cover tape, and also teaches that an antistatic material, which can be an intrinsically conductive polymer, is coated between the edge strips (see page 4 of Paper No. 5). As such, Lin discloses the invention as claimed. It should be noted that the fact that Lin discloses additional structure not claimed is irrelevant.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
